DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Takeshita '174. Takeshita discloses a two stage snowthrower (figures 1-11) comprising an auger housing 56 having a transversely extending auger 57 for gathering snow lying on the ground, a cylindrical impeller housing 58 behind the auger (as seen in figures 4 and 5) having a circular cross section and carrying an impeller 59 therein and a snow discharge pipe/chute (generally 61) on top of the impeller housing, the snow discharge pipe/chute being joined to the impeller housing in such a manner that the circular cross section is interrupted and joined by the pipe (as seen in figure 5, phantom view) but separated by a gap (as best seen in figure 4). Further, Takeshita shows the discharge pipe tapering outwardly (as seen in figure 4) as it extends downwardly towards the impeller housing as well as the use of a bypass area (as denoted by arrows in figure 4).
